Your End-to-End Graphics System

Fusion is your end-to-end graphics system powered by NewBlue Titler Live 3 Broadcast. Fusion empowers you to streamline your workflows and seamlessly deliver unlimited layers of graphics for any broadcast. Quickly prepare your graphics and work with leading streaming solutions to leverage dual channel HD-SDI key/fill or up to 16 channels of 4K-NDI.

Design

Leverage 3D animated graphics from any design source. Import existing Photoshop, ESP, and After Effects art or work in the included Title Designer to create your own stunning designs.

Automate

Seamlessly connect your graphics to social media, scoreboards, spreadsheets, and more. Control your graphics with a powerful API to customize your workflows and integrate any data into your broadcasts.

Integrate

Work with leading streaming solutions including Wirecast, NewTek, Broadcast Pix, vMix, Blackmagic Design, Roland, Panasonic, EVS, and more.

Deliver

Leverage dual channel HD-SDI key/fill or up to 16 channels of 4K-NDI. Deliver unlimited layers of graphics per channel to bring your broadcast to the next level.

Product Features
